

Aerial Work Platforms

Aerial Work Platforms - There are a lot of accessories for forklifts that can be used to be able to help expand the functionality of your forklift and allow you to pick up stuff, handle materials with less effort or to complete clean-up jobs.

Lots of the accessories are particularly designed to be able to fit on the blades themselves. Blade extensions for instance, are used whenever you need much more fork length, which increases lifting capacity. Fork extensions come in lengths ranging from forty eight to one hundred twenty inches. Rounded or triangular attachments are one more variety utilized if transferring rolled material so as to make sure it does not roll off of the typical flat blades.

Examples of lifting attachments include pivoting and telescoping crane or boom attachments. They can come in a number of different styles and are normally designed for transferring metal bars, lumber, poles and various sort of bulky stuff. Other attachments like for example other styles of hooks and hook plates are obtainable so as to pick up things using a chain or sling. Magnetic lifters and slab lifters are other things which can be utilized with hook accessories. Slab lifters are specialized accessories which are meant for lifting a variety of materials which are delivered in a sheet or slab format. Carpet poles and rug rams are other lifting tools that connect to your forklift so as to make transporting rolls of carpet much easier. The accessory connects onto the forklift's forks and has a pole which goes through the middle of the carpet roll.

There are several various types of forklift attachments which can be intended for facility maintenance like for example snow forks. These forks attach to front end loaders and can move materials like soil, snow and dirt. Other popular cleanup accessories comprise magnetic sweepers and standard sweepers. Standard sweepers consist of a broom that the forklift blades hook onto for sweeping large spaces like for example parking lots or warehouse and factory floors. The magnetic sweeper is the same except that it has a magnetic plate rather than bristles. The magnetic sweeper is utilized in areas where there is lots of metal fragments such as on shop floors for instance. Sweepers have widths as much as 60 inches and this surface area makes clean up simple and fast.

A material spreader is one more forklift attachment that is normally used at facilities. These spreaders are helpful for a range of applications like for example spreading ice melt, rock salt, pellets, seeds, fertilizers, insecticides and seed.

Work platforms are another optional lifting attachment that many companies use day after day. The platforms range in size from 36" x 36" to up to 60" x 60". There are several units available which are capable of folding up and storing into a smaller space. Work platforms are designed to raise staff up to an overhead location making use of the lift truck. Larger platform units have added space for employees so as to carry tools and other necessary items intended for the job. Often work platforms are made of steel or ploy material.
