

Clark Forklift Parts

Clark Forklift Parts - Currently, there are at least 350,000 Clark lift trucks performing globally, and in excess of 250,000 in use in North America alone. With five main lines across the globe, Clark is proud to be one of the most expansive corporations in the industry. Heavy duty vehicles ranging from 1,500lb to 18,000lb capacities, dual fuel, gas, LPG, hand-driven lift trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift has 20 exclusive designs of lift trucks, with parts covering more than 120,000 specific items for all of its automated equipment. Your local Clark Supplier is your complete source for availability of all your parts needs offered by Clark Totalift.

Clark features a phenomenal Parts Supply team. The components warehouses are conveniently positioned in Changwon, South Korea and Louisville, Kentucky to make certain exceptional service to both their customers and their sellers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing companies. Driven to supply the highest level of value and service to our customers, Clark remains on the cutting edge when it comes to improving output and benefiting performance.

Internationally, Clark has one of the most outstanding dealer support networks. With over 550 locations globally, supplier representation in over 80 nations and 230 locations in North America, their high level of dedication to their customers predominates the material handling market.

Clark proudly remains an progressive leader of the material handling industry, pioneering protection features such as the worker restraint system. This exceptional commitment to safety is now a customary feature on every lift truck.

Clark's recurrent effort to boast the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 - Clark, is the first forklift maker across the world to be certified with the internationally accepted quality standard ISO 9001 for all of their manufacturing facilities. Furthermore, the ISO 14001 Environmental Management System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement enables Clark to be ready for any number of environmental limitations, thus placing them in a dominant market position.

Clark has selected the structure of "Lean Production" at all of its assembly plants because this system is particularly economical and permits minimal use of resources. Established to ensure maximum proficiency, this system is designed to discover and acknowledge the most effective methods for manufacturing facility management. Clark has completed this transition of its Korean plant. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and production efficiencies.

Clark's product engineers and suppliers communicate together to enhance the efficiency and brilliance of their merchandise while minimizing expenses. The contemporary value engineering agenda combines progressive product growth and delivers superior customer support and service within the industry.
